

*Mirror, mirror on the wall .....*

who can clean carpets the best of them all?

Would you like to hear more?

It's certainly no fairytale story but Drytron promise a *happily ever after* service. My *dwarfs*, Steven and Aaron (or Doc and Happy as I call them) can give your carpets and upholstery the *hi-ho* treatment.

We are the carpet cleaning experts for this area and I thought that should write to you in the off chance that you might need our service one day, so you'd know who to call. By the way I'm Danielle and with my husband Steve, we are the local Drytron Operators.

There are no poison apples, no talking magic mirrors and certainly no wicked step mothers. We provide a friendly, professional and courteous service. The system we use for carpet cleaning is probably one about which you are aware because it is a DRY cleaning process rather than a steam or 'wet' cleaning process. Known as the Drytron system it has the advantage that the carpets can be walked on after about an hour or less (compared to other methods where carpets cannot be walked on for up to 48 hours after cleaning).

Well that's where I can help. If you'd like to, we'll come and give you a free quote. Of course there's no obligation to use us. Have a think about it and give us a call at the office on 131 250 or (03) 5382 3363 and we'll drop in. We can make you feel like Snow White!

*And you could live happily ever after*

Danielle Olver

'The fairest of them all'
